

STAR-1100 Software Support
Termination Notice
July 1, 2009

FCI hereby announces termination of support for all STAR-1100 levels prior to STAR-1100 8R1. FCI will continue support of all STAR-1100 Release 7 levels until June 1, 2010.

The STAR-1100 8R1 Release Announcement, now available on the FCI web site, contains a step-by-step approach to upgrading to level 8R1. Sites currently running STAR-1100 levels prior to release 7R3 are urged to upgrade to 7R3 prior to moving to 8R1, to facilitate transition.

FCI has made major changes to STAR-1100 8R1 in the following areas:

- STAR VTL Virtual Tape Recognition and Processing
- STAR Scratch Pool Server
- Tracker Subsystem for enhanced Audit File monitoring
- Software License Key file and Validation
- New Physical Media Recognition and Reporting
- Media Encryption Recognition and Reporting
- New Scratch and Clean Parameters
- Automatic Attribute Feature Enhancements
- LABEL Processor Enhancements
- New Paperless Support

In addition FCI is dropping support for STARPC and STARPC background Server.

A complete description of the above enhancements is contained in the STAR-1100 Level 8R1 Release Announcement now available on our web site www.formula.com.

FCI is a software development and consulting firm. FCI's product line includes STAR-1100 and OTS-100, two of the most successful third-party vendor products for Unisys 1100/2200 users, as well as IDS-2200, a new product for intrusion detection and reporting.
